Special features

Caution: Read this section carefully to ensure safe operation.

This unit is the amplifier designed exclusively for use with the center speaker and subwoofer of the surround system of the KA-996 or KH-896.

This unit allows to enjoy the surround play more effectively.

- A volume control is provided for the subwoofer so that sound can be played with a good balance.
- The KM-996 can be used as the amplifier for the second (B) sets of speakers of the KA 996 and can be switched over with the surround /B speakers.

Before applying power

Units are designed for operations as follows.

- Canada AC 120 V only
- Australia AC 240 V only
- *Other countries AC 110-120/220/230-240 V switchable

*AC voltage selection

The AC voltage selector switch on the rear panel is set to the voltage that prevails in the area to which the unit is shipped. Before connecting the power cord to your AC outlet, make sure that the setting position of this switch matches your line voltage. If not, it must be set to your voltage in accordance with the following direction

Move switch lever to match your line voltage with a small screwdriver or other pointed tool.

Note
Our warranty does not cover damage caused by excessive line voltage due to improper setting of the AC voltage selector switch.
